## NCS Prospect Fair

The NCS Prospect is a "first time ever in Norway". Service-companies will get the opportunity to share prospects defined by seismic- and EM-data, while the oil companies are given the opportunity to present prospects where they would like to share risk, or want to farm-out of, partly or fully. These events are common in the UK and the US, but this is the first time such an event is available to companies active on the NCS.

## Networking and social programme

With speakers and participants from the authorities, oil companies, service companies, consultants as well as the universities, this conference represents an excellent opportunity for networking. The social programme includes coffee breaks (!), conference dinner, and dinner entertainment. In addition, the venue is superbly located for outdoor activities including field trips (geology, ornithology) and exercising.

## Field trip outside the hotel

In the afternoon of the first day participants in the conference are invited to join us on a short field trip outside the hotel and along the fjord emphasizing the Cambro-Silurian section of the Oslo Graben and its relevance to the NCS. Professor Hans Arne Nakrem from the University of Oslo and Morten Bergan in Bayerngas will be our guides. We plan for a leisurely walk, but bring hiking shoes (and lenses).

## Entertainment

There will be a short session with musical entertainment during Wednesday dinner. Langhus Blæselag dressed up in «Lederhosen» will contribute with Ompa-ompa music, and you may sing along and swing your glass. One of the cornet players (and reserve conductor) of the orchestra may look familiar to you. It is Geir Lunde, Managing Director of Concedo ASA.
